Detector-level predictions for COHERENT CsI-2021

$\hat{C}^{6u}_{1,e\mu} = \hat{C}^{6u\,*}_{1,\mu e} = 10^{-5}\ \mathrm{GeV}^{-2}$

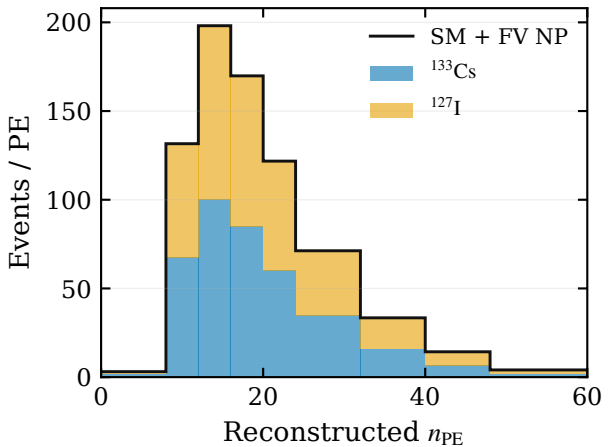

(a) SM and flavor-violating NP

(b) Source-resolved excess

(c) Physical target contributions

Signal predictions only; current time-integrated SNS and antineutrino conventions
